```java
package com.publicept;

/**
 * Animal
 *
 * eat()
 * move(int speed)
 */
public class Animal {

    private String name;
    private int brain;
    private int body;
    private int size;
    private int weight;

    public Animal(String name, int brain, int body, int size, int weight) {
        this.name = name;
        this.brain = brain;
        this.body = body;
        this.size = size;
        this.weight = weight;
    }

    /**
     * eat
     */
    public void eat() {
        System.out.println("Animal.eat() called");
    }

    /**
     * move
     */
    public void move(int speed) {
        System.out.println("Animal.move() called. Animal is moving at: " + speed);
    }
}
```
